

SALTO SPACE Basic Certification Training - F•cHalf 201J

TRAINING GOALS: DAY 1 & 2

The attendee will gain a basic understanding of SALTO System's online resources & technical support structure. Upon completion, they will be able to specify, install & implement SALTO's SPACE application & associated hardware.

LEARNING OBJECTIVES:

1. Understand differences and relative advantages and disadvantages of low and high frequency RFID and mobile credential technologies.
2. Have top-level working knowledge of SALTO's technology platforms to include: SALTO SPACE and integrations platforms, as well as location of dealer resources for full details.
3. Know how to find and use key SALTO resources such as the product catalogue, SALTO websites and Partner Area to find key information on products and commercial support.
4. Understand and demonstrate the key distinctions of SALTO's wire-free, wireless and online access points, and how they create the SALTO Virtual Network (SVN) to create flexible solutions that add security and usability to installations.
5. For the SALTO XS4 product line, including mortise and cylindrical products, understand the products' key features, proper reference number specification, and know how to install and implement them correctly.
6. Understand SALTO's wall reader and controller solutions, their key features, how to differentiate and specify the correct models, and know how to install and implement them correctly.
7. Know how to access SALTO software portal to register, download and install software (including upgrades).
8. Using ProAccess SPACE interface, be able to commission a system with minimum parameters such as doors, users, zones, time periods, time zones, operator groups, operator permissions and their passwords.
9. Demonstrate the ability to create a system backup and conduct audits using the software.
10. Know how to correctly use, specify and explain to end-users necessary system management peripherals to include Encoders and Portable Programming Devices (PPD).
